2. Citations and explanations (Rule 70.7)			
<p>Document D1 is considered to be the closest prior art. It discloses a largely automated order-picking installation, the automation also extending to the operation of refilling the supply magazines.</p> <p>The subject claimed, an apparatus for providing stackable goods and a corresponding application method, differs from D1 = DE2736197 solely by way of the displaceable positioning carriage (32) with measuring device (33). It is also the case that corresponding features are neither known, nor can be gathered, from the rest of the prior art. The subject matter claimed is thus novel and involves an inventive step (PCT Article 33(2) and (3)). The present application thus meets the requirements of PCT Article 33(1).</p>
